

MOTUS REIMBURSE

Cents-Per-Mile

Mileage Reimbursement for Every Driver

Every driving employee has unique reimbursement needs. Cents-per-Mile (CPM) programs can be a good fit for low and mid-mileage drivers, using the IRS mileage standard or other fixed rate to reimburse for business mileage in personal vehicles. **With a Motus CPM program, businesses can:**

- Provide cost-effective and equitable reimbursements regardless of driving frequency.
- Reimburse in alignment with employee needs and payroll practices.
- Reduce the risk of mileage fraud and increase compliance.
- Gain complete visibility and insights into full driving workforce.

Motus CPM Unlocks:

- Up to **20% SAVING** with automated mileage capture compared to self-reporting.
- Roughly **21 HOURS** saved per year, per employee on mileage reporting.

Benefits of Motus Cents-Per-Mile

With Motus CPM, administrators gain seamless access to program controls and single-source visibility across their business driver population. Companies can also implement key driver safety programs across their driving workforce that verify insurance and identify high risk drivers through continuous Motor Vehicle Record (MVR) monitoring. Drivers then benefit from automated mileage capture, tax-free reimbursements and more frequent payments that meet their needs.

A Powerful Vehicle Reimbursement Platform

Motus provides powerful yet simple tools for administrators to monitor and manage their entire vehicle reimbursement program. With simplified management workflows, convenient approvals, seamless payments and informative reporting and business intelligence, Motus provides a convenient experience and simplified processes for both administrators and drivers.

Benefits to Employees

With automated mileage tracking, drivers no longer need to log miles and manage paperwork, giving them back time in their day. Once the company determines a reimbursement rate, program administrators can remain relatively hands-off. Mobile workers can receive more frequent reimbursements based on their personal needs and those of the company with our flexible reimbursement schedule.

[Adherence to IRS regulations](#) also ensures that CPM reimbursements are tax-free, so employees receive a complete payment. Employers can also reward their mobile workforce with a higher CPM rate, either in recruiting efforts or as a general benefit.

Key benefits of the Motus Platform

Gain oversight across vehicle programs and users.

Improve program health with visibility into areas that require attention.

Align drivers to the best program based on their needs.

How Mileage Capture Technology Impacts CPM Reimbursement Costs

Average mobile worker drives 15,000 miles/year

3,750 miles

Using mileage capture technology, employers identify that **each mobile worker overestimates their mileage by 25% = 3,750 extra miles**

\$6,019

Adjusted company impact

\$200,625

By implementing mileage technology, employers can save **\$2,006 per mobile worker per year, or \$200,625 (assuming 100 total mobile workers)**
