

# Motus Protect:

## Proactive Risk Mitigation for Employee Driving

Employee driving creates hidden risk across your business, from coverage gaps to unsafe driving that can become costly. Motus Protect reduces that risk with year-round insurance and MVR monitoring and driver safety training to keep your program compliant and your team protected.

### A better way to protect your business

**Do your employees have adequate insurance coverage?**

#### Automate accountability

Implement year-round insurance monitoring with automated alerts so you know when employee coverage lapses or changes.

**1 in 3 drivers are uninsured/underinsured.**

(Insurance Research Council)

**Do you know about high-risk driving events as they happen?**

#### Increase visibility

Move from point-in-time reviews to continuous motor vehicle record (MVR) monitoring that flags high-risk events as they happen.

With continuous MVR monitoring, Motus customers know about high-risk events on **average 98 days sooner** than companies who do annual checks.

**Are your drivers protecting themselves with safe driving behaviors?**

#### Make safe driving top-of-mind

Embedding short safety lessons in the same app drivers use to track miles makes it easy for drivers to complete their training.

**Motus drivers complete Road Smart lessons** in an average of 4 days.

## Core Capabilities

### Monitor

Continuous MVR monitoring and automated insurance monitoring.

### Train

Short, two-minute safety lessons delivered directly in the mileage app drivers already use.

### Automate

Schedule compliance checks monthly, quarterly, or biannually for year-round visibility. Automate risk mitigation with required safety training.

### Mitigate

Reduce risk when you know year-round that drivers are licensed, insured, and trained.

## One platform. Total employee driving coverage.

### Motus Reimburse includes built-in capabilities enterprises need:

- ✓ Mobile app for drivers with automatic GPS trip capture for accurate, easy mileage tracking
- ✓ Automated workflows for approvals, compliance monitoring, and tax reporting
- ✓ Enterprise-grade analytics to track mileage, reduce waste, assess tax impact, and boost productivity
- ✓ Seamless integrations with systems you already use

### Motus Protect brings risk mitigation solutions into the same workflow for your team:

- ✓ Insurance monitoring year-round so you know when employee coverage changes
- ✓ Continuous motor vehicle record monitoring (MVR) with proactive risk alerts
- ✓ Driver safety training you can require to submit mileage
- ✓ Automated within reimbursement workflows to meet insurer requirements and reduce liability

### TANGIBLE BUSINESS IMPACT

Fair, accurate reimbursement employees trust

Reduce total reimbursement costs up to 40% through tax advantage and visibility

Less admin work for drivers, managers, and finance teams

Reduced corporate liability risk

**Motus: The complete solution for employee driving.**
